

An abstract graphic composed of several thin, teal-colored lines. These lines form a large, irregular shape that resembles a stylized map of a region, possibly a country or a large island. The lines are interconnected, creating a network-like structure. The overall shape is roughly triangular, with a wide base and a pointed top. The lines vary in thickness and direction, giving it a dynamic, hand-drawn feel.

Short story of Gepidas

The Gepids were an East Germanic tribe which who spoke the same language as the Goths, but probably different dialects. The first unequivocal archaeological traces of this ethnic group come from the 2nd-3rd century and can be followed up to the estuary of the Visztula River.

They were presumably of Eastern German origin, and considered themselves rich and generous. They first appeared in the Carpathian Basin in the 3rd-4th century, around the Szamos. They never interbred and relations between the two tribes was tense. At times, they had substantial power and they fought the Goths and other ethnic groups for important territories.

The Gepids were initially ruled under a federal tribe system and lived in village communities. The real power was held by the folk convention, which was a union of the armed forces. They elected a king only in certain important historical situations. They were conquered by the Huns when the Hun kingdom and empire evolved, but they managed to maintain their self-identity: they become allies of Attila. After Attila's death, the Gepids probably also acquired the Hun kingdom's treasury, occupying significant territories in all directions, and were recognised by the Byzantine Empire. The Byzantine Emperor greeted the Gepids as his ally, and through commercial connections the Gepids became prosperous. Further conquests and defeats, large geo-political shifts and inner power conflicts caused the central power to weaken, and affected the formation of more royal courts. In light of this, a uniform regiment came into existence in the 6th century. In the middle of the 6th century the Gepids

occupied the Byzantine city of Sirmium, where they established their royal court and treasury. Byzantium revoked their annual grant and made a confederation with the Lombards, providing them with important territories in the old Goth Pannonia. The two Germanic ethnic groups, the Gepids and the Lombards, fought each other for around 30 years, and the less well armed Gepids suffered defeats against the Lombard cavalry. They lost the Byzantine territories they had occupied, but kept hold of Sirmium, where the first early medieval silver coins of the Carpathian Basin were made.

Later on Byzantium breached the agreement with the Lombards as well, and attacked the Gepida territory together with their new allies, the western refugee nomad Avar ethnic groups. The Gepida army suffered a devastating defeat, their king was killed, and their treasury was safely removed to Byzantium, while the population moved to Italy. Under the large-scale Avar occupation, the Gepids were essentially wiped out, with only smaller Transylvanian centres surviving. However, during the 7th century these small groups were all subsumed by other ethnicities in the region. The most significant of the Gepida graves that have been unearthed are in Szilágysomlyó in Transylvania, where the royal treasures – presumably from the reign of the Hun Empire – were buried.

Story of GEPIDA

1993

Our story starts in the middle of this year in Murányi Street... We start from a small 40 sqm shop with only a few bikes. We import full bikes and most of them are stored in the underground garage.

1998

One of the most significant stages in our history: we buy the Gepida brand name and enter the international stage at the most prestigious exhibition in Europe.

2004

Our bravery will be rewarded! We are strengthening the Gepida name in the market of electric bicycles and our range of bicycle types is expanding. We are able to serve our already 80% foreign customers with better and better bikes. We can already meet Gepida bikes on the roads in 10 other countries besides Hungary. Compared to the beginning, the number of our employees is doubling, now 40 of us are working together in one team!

1994-1997

Thanks to our commitment, already 1 year after the start we rent a 20 times larger assembly hall. Our first production line is built and almost immediately we become known as Olimpia in Hungary. Our small team of only 20 people goes from strength to strength! We will dismantle our 100,000th bicycle in 1997!

2000

We are launching our first electric bike with the Sram Sparc 5-speed electric system, and with that, we are finally casting our vote for electric bikes. We are boldly embarking on a new path, which is still unknown in Hungary.

2016-2017

The Gepida brand fly to the heights, both at home and abroad. We ship almost fully electric bicycles to 30 countries already, our team reaches 100 people. We create our top model, the Asgard FS, which is unique in the market in terms of design. We open the Gepida Factory Store in Budapest, where the entire product range can be viewed.

2021

In a world turned upside down, Gepida is still standing stable! We are launching a major investment, building a new logistics center in Budapest. We are also starting direct sales to private customer in Germany and the Czech Republic. The recognition of Gepida is constantly growing, thanks to the persistent and dedicated work of our team!

2010-2013

This period is characterized by continuous development and an expanding bicycle market. We introduce our own mobile application and we also develop our own electrical system called GPDS. In 2012 the 1,000,000th bike will roll off our production line.

2019

We are setting another milestone in the history of Gepida: we are launching our online webshop, which is open to our Hungarian private customers in the first round. This year we are already represented on 3 continents in the world.

And what comes after that..

The year 2021 was also a challenging year globally, where the importance of **healthy lifestyle** and the **protection of the environment**, so cycling as a way of life, came to the fore.

The rising demand and continued depletion of stocks pose challenges for both manufacturers and buyers. However, we at Gepida are still hold one's ground. Armed with the **experience of the last 29 years** and standing on the solid foundations laid so far, we will continue the work.

We are constantly striving to produce **reliable**, **practical** and **efficient bicycles** in 2022, to meet the needs of our customers, carrying the characteristics of Gepida's modern and innovative solutions.

As a result of our commitment, we will continue to offer our customers new models in 2022 - be it **pedelec** or **conventional bicycles** - a reliable companion, both in the city and in the tougher, mountainous terrain.

BOSCH: THE IDEAL DRIVE UNIT

With Bosch's world-renowned drive systems, we can provide unique eBike experience to any Gepida owner!

ACTIVE LINE GEN 3

Whether you need to get to work in the morning or to a restaurant in the evening: Active Line brings the joy back to urban mobility - even in rush hour. Smooth, lightweight and quiet, it is the ideal way to get around town. Its controlled acceleration with barely noticeable pedal resistance at over 25 km/h or when switched off turns every trip into a delight, as well as making an elegant statement. The Active Line is a recipient of the Red Dot Design Award. The drive unit integrates perfectly into the bike's frame and its light weight completes the impressive package.

ACTIVE LINE PLUS GEN 3

The easy way to generate new experiences: The desire for new discoveries knows no bounds. Not even in the city. Active Line Plus brings mobility to everyday life and extends your options for spontaneous trips. The quiet yet powerful drive unit offers significant riding enjoyment. It allows agile handling and fits perfectly inside the frame of the eBike. Incredibly quiet and barely noticeable pedal resistance over 25 km/h. New experiences and discoveries await!

PERFORMANCE LINE GEN 3

The Performance Line is the most versatile drive system from Bosch. Whether you're on a sporty jaunt through the countryside, commuting to work or cruising on a leisurely outing, it always delivers the right support at the right moment. There are two variants. The Performance Drive Unit provides support with a torque of up to 65 Nm and a maximum speed of 25 km/h and offers a naturally sporty riding sensation. It enables riders to get the most out of outings, even in mountainous terrain. The Performance Speed Drive Unit enables high speeds to be reached even faster, while long distances can be covered with ease. It supports S-Pedelecs up to 45 km/h and will speed riders on their way with a torque of 85 Nm from model year 2021 onwards.

PERFORMANCE LINE SPEED GEN 4

With a whopping 85 Nm of maximum torque and a low weight of only 2.9 kg developed for dynamic support in everyday life or in leisure use. High speeds are reached quickly - the perfect way to cover long distances effortlessly. The higher torque of 85 Nm ensures a more dynamic riding sensation, especially in low cadences.

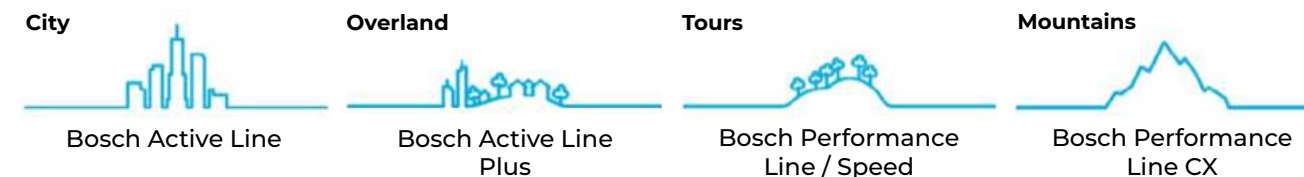

PERFORMANCE LINE CX GEN 4

The Performance Line CX offers a unique eMTB experience: Compact, lightweight and with more power, it combines high-quality materials, an extremely powerful drive and high-end sensors. This brings eMountain biking on the trail to a whole new level. From model year 2021 with a torque of up to 85 Nm, features in the motor control and a further development of eMTB mode - all as a software update. For a thrilling riding experience: more natural, intuitive and powerful and an absolute benchmark in its class.

CARGO LINE GEN 4

From making deliveries to customers or getting the kids to kindergarten or doing the shopping, the Cargo Line, which is designed specially for cargo bikes, makes transport easy and convenient. Whether laden or unladen, The Cargo Line Drive Unit responds precisely and predictably in every situation. There will be a software update for the Cargo Line for the 2021 model year: In addition to a stronger torque of 85 Nm, cargo bikers will also benefit from more dynamic adjustment. The motor now provides more powerful support at low cadences, offering a greater boost when the rider starts off or accelerates. This makes everyday transport more relaxed and ensures maximum riding enjoyment on delivery rounds.

For the 2021 model year, Bosch is launching a software update for the Cargo Line that will increase the maximum torque to 85 Nm and further improve riding comfort. The software update is available for cargo bikes with the Cargo Line Drive Unit and can be installed by retailers from summer 2020 onwards.

Less noise. Less maintenance. A whole lot more fun.

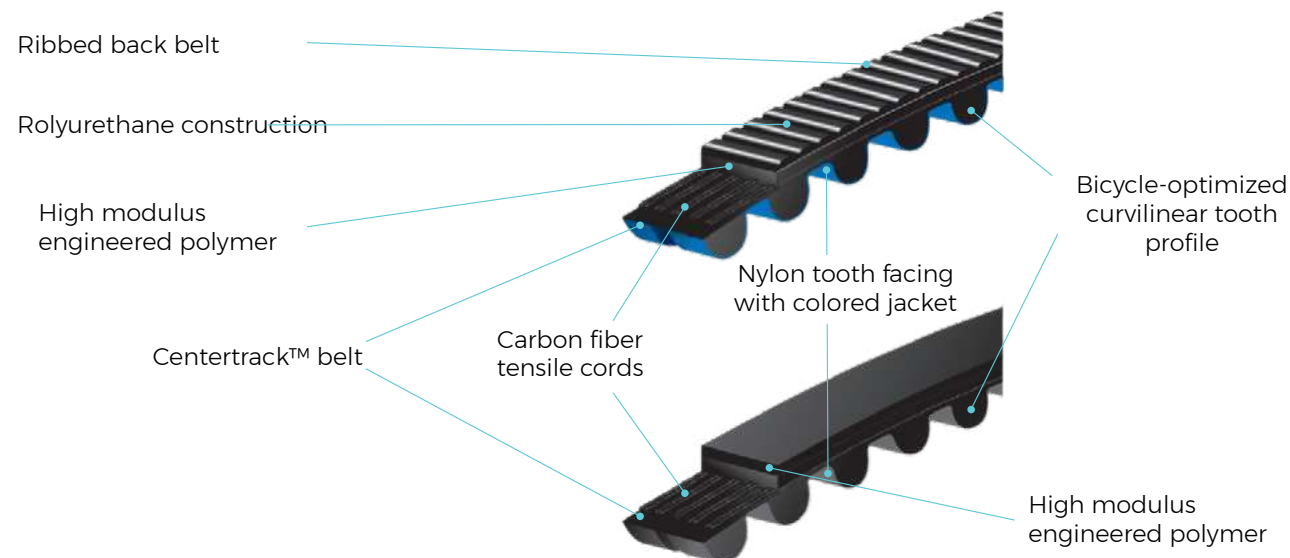

WHAT IS GATES CARBON DRIVE?

The technology behind Gates Carbon Drive System is rooted in high horsepower motorcycles and dragsters. Now, this high performance technology has been perfected for a wide variety of bicycles.

At the core of the drive is the Carbon Drive belt. Custom made, this 11mm pitch, carbon-fiber belt is a strong and efficient replacement to a traditional bike chain. The drive is completed with our innovative sprocket designs and your choice of internally-geared or single-speed hub.

The patented Gates Carbon Drive System gives you a longer-lasting, lower maintenance drive, and most importantly, an unbelievably awesome ride.

CDX + CDN belt construction

WHY GATES CARBON DRIVE?

LIGHT

Gates Carbon Drive weighs less than a chain drive. Lighter weight means higher performance.

CLEAN. LOW MAINTENANCE.

No lube required = no grease stains. It sheds dirt and grime and cleaning with water is easy. Just get on it and ride.

STRONG.

The instant engagement and smooth feel is unlike anything you've experienced before. You've got to ride it to believe it.

QUIET.

No chain = no chain clatter. It's spooky quiet.

CITY-URBAN

Whether you are commuting to work or arranging your daily to-dos, we would gladly recommend you any one of your Urban E-Bike family. High quality and unique design enable quick and stylish pedalling through the streets. Due to the electric assistance, you can also cover greater distances without mentionable physical effort, so you can arrive at the first morning meeting even in a suit or costume in top shape.

SPECIAL E-BIKE

SPECIAL

We are pursuing novelties, and we are doing so to optimise the utilisation. This is how our special category was developed, which is the boundary between trekking and city bikes. Touring or cruising in the city, or transport on two wheels with green energy? These are all there in this category.

Urban Transport without compromises

With its clever folding frame and fully integrated battery, the Miliare gives you flexibility without compromising comfort or performance. Commuting on the train, or taking a road trip in the campervan, the Miliare is ultimate compact solution in personal mobility. Surprisingly light weight so folding and unfolding is easily done, while the optional Gates belt drive system allows clean and maintenance free operation.

TREKKING E-BIKE

TREKKING

Our trekking e-bikes are designed to go thousands of kilometres with an engine specially designed for this. The essence of endurance and power; it delivers performance harmoniously, be it an uphill climb or a flat ride. Long distances can be covered thanks to the greater capacity batteries. There are no more limits, reach for the stars!
